

BASIC GOALS

Creation of AIAPS is represented a new stage in understanding and development of the theory and practice of the international security.

Involvement of wide sectors of society in fight against corruption, organized crime, illegal migration, human trafficking, distribution of the weapon, drugs opens much more opportunities in this direction. Thus the principle of collective security is realized. In comparison with opportunities of power departments of the states the potential of all society mupo23ptye(a)3n54i al snt3w[(po)85m(ty)5(ain54i)8 (nt)3[b54i the level of NGO and their members;

- use of potential of NGO, private security firms and detective agencies in fight against crimes which are danger to society.

The first problem is solved by AIAPS Academy creation:

- carrying out basic researches according to the theory of public safety;
- training of specialists of various levels of management in the field of safety;
- informing on the purposes, tasks, methods of activity of the organization;
- dissemination of knowledge in the field of ensuring public safety and mechanisms of decrease in level of threats.

The second problem is offered to be solved by creation of the International analytical center (Council) of monitoring and audit of problems of safety. Creation of IAC AIAPS allows to solve the second problem by creation of expert groups on problem situations, carrying out an expert assessment of "pre-crisis" conditions, development of recommendations, techniques, information support of "crisis"

situations, carrying out social audit of a wide range of activity of objects and subjects in the field of safety.

Available opportunities and intellectual potential of the international experts at the present stage in AIAPS allows:

- to carry out monitoring of public processes (policy, economy, the right, a crime, etc.)
- to predict situation development in all areas of public life from the point of view of safety for the next years;
- to reveal "pre-crisis" conditions and "crisis" situations;
- to make recommendations about decrease in level of threats and condition improvement;
- from approval of the management of AIAPS (UN) to render information and other types of support of official bodies, individuals, the enterprises, NGO in fight against the crisis and negative phenomena in society.

Offers: to create AIAPS Academy and the International analytical center (Council) for monitoring and audit of problems of safety of AIAPS with branches in each of the participating states.

AIAPS Academy tasks:

1. Scientific maintenance and development of theoretical bases, methodologies of activity of AIAPS;
2. Training and training of specialists on public safety;
3. Selection and scientific certification of teachers, experts;
4. Development of techniques, training programs. Will organize and carries out comprehensive skilled and experimental, technological, search, applied and other research works;
5. Development and realization of own innovative educational programs, projects, technologies of protection and counteraction to threats to society;

6. Creation and development of the electronic AIAPS edition of scientific, educational, methodical and other types of information materials;

7. Carrying out PR-actions on organization promoting: carrying out competitions, programs, actions for informing on AIAPS organization activity.

Problems of IAC AIAPS:

1. Monitoring of a condition of public safety;

2. Forecasting of development of a situation;

3. Carrying out audit (by types of public safety);

4. Development of councils and recommendations about condition improvement;

5. Ensuring cooperation, coordination and coordination of actions of the state structures, local governments, public organizations, non-state security services, mass media;

6. Legal maintenance of activity of AIAPS
